

Art Unit: 2821

watch dial in a planar manner, said watch dial is made of a non-metallic material, said outer case and said caseback member are mutually joined by a screw mechanism, the mutual loosening torque between said outer case and said caseback member being $0.1 \text{ N} \cdot \text{m}$ to $6.0 \text{ N} \cdot \text{m}$, and preferably being $0.2 \text{ N} \cdot \text{m}$ to $3.5 \text{ N} \cdot \text{m}$, and said metal exterior parts and said antenna are set so that a gap between an inner surface of said caseback and said antenna is $100 \mu\text{m}$ to $700 \mu\text{m}$ - -.

Claim 33, line 8, "is shorter than the maximum diameter of the metal exterior parts" has been changed to - - is shorter than the maximum diameter of the metal exterior parts, and said metal exterior parts and said antenna are set so that a gap between an inner surface of said caseback and said antenna is $100 \mu\text{m}$ to $700 \mu\text{m}$ - -.

Claim 54, line ~~1~~¹, "any one of claims 1, 3, 5, 18, 19 or 33, wherein said metal exterior parts and said antenna are set so that the thickness of a body member of said metal exterior parts is $300 \mu\text{m}$ to $5000 \mu\text{m}$ " has been changed to - - any one of claims 3, 5, 18, 19 or 33, wherein said metal exterior parts are set so that the thickness of a body member of said metal exterior parts is $300 \mu\text{m}$ to $5000 \mu\text{m}$ - -.

Art Unit: 2821

wherein said metal exterior parts are set so that the thickness of a caseback member of said metal exterior parts is 100 μ m to 5000 μ m - - .

Claim 59, line ¹/₂, "any one of claims 1, 3, 5, 18, 19 or 33, wherein said metal exterior parts and said antenna are set so that the thickness of a caseback member of said metal exterior parts is 300 μ m to 2000 μ m" has been changed to - - any one of claims 1, 3, 5, 18, 19 or 33, wherein said metal exterior parts are set so that the thickness of a caseback member of said metal exterior parts is 300 μ m to 2000 μ m - - .

Claim 60, line ¹/₂, "any one of claims 1, 3, 5, 18, 19 or 33, wherein said metal exterior parts and said antenna are set so that a gap between an inner surface of said caseback and said antenna is 0 to 5000 μ m " has been changed to - - any one of claim 1 or 3, wherein said metal exterior parts and said antenna are set so that a gap between an inner surface of said caseback and said antenna is 0 to 5000 μ m --.

Claim 61, line ¹/₂, "any one of claims 1, 3, 5, 18, 19 or 33, wherein said metal exterior parts and said antenna are set so that a gap between an inner surface of said caseback and said antenna is 100 μ m to 700 μ m" has been changed to - - any one of claim 1 or 3, wherein said metal exterior parts and said antenna are set so that a gap between an inner surface of said caseback and said antenna is 100 μ m to 700 μ m - - .

Claim 66, line ¹/₂, "any one of claims 1, 3, 5, 18, 19 or 33, wherein a non-magnetic material having an electrical resistivity of 7.0 $\mu\Omega \cdot \text{cm}$ or less is fixed to an inner surface of said metal exterior parts" has been changed to - - any one of claims 1, 3, 5, 18, 19 or 33, comprising a non-magnetic material having an electrical resistivity of 7.0 $\mu\Omega \cdot \text{cm}$ or less is fixed to an inner surface of said metal exterior parts - - .

Allowable Subject Matter

5. Claims 1, 3-5, 7-36 and 38-70 are allowed.
6. The following is an examiner's statement of reasons for allowance:

Prior art fails to disclose or suggest in combination with the remaining claimed limitation:

(a) a metal exterior parts is configured so that said antenna can receive magnetic flux from outside said metal exterior parts, and can resonate, said watch dial is made of a non-metallic material, and said metal exterior parts are set so that the thickness of a body member of said metal exterior parts is 300 μ m to 5000 μ m in claim 1.

(b) a metal exterior parts is configured so that said antenna can receive magnetic flux from outside said metal exterior parts and can resonate, said watch dial is made of a non-metallic material, said electronic watch includes a solar cell, which serves as the drive power of said watch movement, between said watch dial and said watch movement, said solar cell being substantially formed by a material that is non-metallic material and that is also magnetically permeable in claim 3, claims 4 and 60-61 are allowed since they are dependent on claim 3.
